Although known to specialists since the nineteenth century, the Aramaic incantation bowls have never been fully integrated into the field of Jewish Studies, largely due to their inaccessibility and the confounding nature of their contents. Fortunately, thanks to the recent publications of many new bowls, combined with an increasing interest in the study of the Babylonian Talmud within its wider cultural context, scholars are now beginning to recognize that the bowls hold tremendous value as the only other extant corpus, alongside the Talmud, produced by the Jews of the Sasanian Empire. Indeed, the vast collection of bowls has the potential to yield important new insights for the study of late antique Judaism. While recent research has demonstrated a range of linguistic, thematic, and cultural correspondences between the bowls and other Jewish corpora such as the Talmud, there are nevertheless many questions that remain to be evaluated. With the goal of advancing the study of this invaluable but neglected corpus, this international conference brings together leading and emerging scholars in the field to present cutting-edge research on the bowls in their late antique Jewish contexts.

*Note that all times below are Eastern Time

Monday, April 4th

8:40 am Introductory Remarks, Alexander Marcus and Jason Mokhtarian

Panel 1: "Jews, Rabbis, and Other Identities"

9:00 am **The Aramaic Magic Bowls and the Jews of Sasanian Babylonia**, Siam Bhayro
9:30 **Jesus Son of Mary Revisited: The Magical Jar from the École Biblique**, Tal Ilan
